

INGENIERIA EN LINEA

Batun, G; Bautista, K; Chávez , E; Pacheco, E; Peña, P;
Autonomous University of Yucatan, Mexico

ABSTRACT

Ingeniería En Línea answers all kinds of questions about the online modality of the software engineering career at the UADY math faculty. The implementation was carried out without setbacks, together with the information in each section, tests were carried out that proved the correct writing of the contents.

The interface design will be handled according to the “Manual De Identidad Universitaria: Identidad institucional e identidad visual” by the Autonomous University of Yucatan, México; following the rules, guidelines and norms they established.

DESCRIPTION

"Ingeniería en Línea" is a spanish website where you will find all kinds of information like advices, points of view, pros and cons of what working and studying online in the online modality of Software Engineering is, and answering all doubts that users may have about this form of developing academically

GOAL

Our main goal in this project is to develop a tool directed towards students that will contain the essencial information to start working in the online modality.

USERS

"Ingeniería en línea" is directed mainly to potential new-entry students that find themselves interested in entering the Software Engineering career.

AVAILABLE ON
